### **DETAILED ACTION**

1. This action is in response to Amendment "A" filed 19 September 2005.
2. Applicant has cancelled claims 1-40 and has presented new claims 41-66. The Examiner has identified the need for a restriction requirement as explained below.

### ***Election/Restrictions***

3. Restriction to one of the following inventions is required under 35 U.S.C. 121:
  - I. Claims 41-57, drawn to a platform system including an access unit, a management unit, and an application unit including first, second, and third network switching modules, classified in class 709, subclass 223.
  - II. Claims 58-66, drawn to providing information service wherein a service request is sent from a user terminal, classified in class 709, subclass 225.

The inventions are distinct, each from the other because of the following reasons:

4. Inventions I and II are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention II has separate utility such as converting a service request from a user terminal and authenticating and authorizing a user associated with the service request. See MPEP § 806.05(d).
5. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

6. Because these inventions are distinct for the reasons given above and the search required for Group I is not required for Group II, restriction for examination purposes as indicated is proper.
7. Because these inventions are distinct for the reasons given above and the search required for Group II is not required for Group I, restriction for examination purposes as indicated is proper.
8. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
